PROFILE SUMMARY

I am passionate about building a future-focused career in Information Technology, centered on modern product development, vibe coding, and real-time digital solutions. I aspire to create innovative and user-driven technologies by combining creativity with smart coding, using modern tools, automation, and data-driven insights to enhance user experience and drive business growth.

WORK EXPERIENCE

HiMat Technologies

2026

Mobile App developer

During my internship at HiMat Technologies, I contributed to the development of the Trougle Travel Companion Mobile Application using Flutter and Firebase. I worked on key features including user authentication, trip management, Google Maps integration, live location tracking, chat, and payment integration.

PROJECTS

Video Call Web Application

- I developed a real-time video calling web application using Node.js, Google Firebase Firestore, and WebRTC that enables users to connect instantly through secure peer-to-peer video communication with seamless data synchronization.

Face Recognition Attendance System

- I developed a Face Recognition Attendance System using Python, integrating OpenCV and face recognition libraries to automate student attendance. The system captures and recognizes student faces in real-time, marking attendance accurately and securely.

CERTIFICATE

ISRO: Deep learning in ecological Studies

GUVI: Python Chatgpt for Everyone

INSTITUTION: 3D Printing

NPTL: Python Programming
